LUTHFIE BUDIE ANDIKA

0852778442 | Luthfiebandika@gmail.com | linkedin.com/in/luthfie-budie | https://luthfiebudie.github.io
Medan City, North Sumatera, Indonesia

A Computer Science graduate driven to build professional expertise in full stack web development, database management, data analysis, and digital media. Proven hands-on experience in building web applications for the financial and entertainment sectors, transforming datasets into actionable insights, designing intuitive user interfaces, and producing engaging visual content. Combines strong analytical problem-solving skills with versatile creativity and clear technical communication to deliver comprehensive solutions. WAWA CHAN

WORK EXPERIENCE

Data Analyst & IT Support Intern | KOMDIGI *Oct 2023 – Jan 2024 | Medan, North Sumatera, Indonesia*

- Maintained wi-fi and localhost server stability to achieve 90% uptime, by servicing hardware, configuring routers, and analyzing network traffic data using Excel and PowerBI.
- Reduce technical issues by 25%, by routinely maintaining office PCs, backing up data and analyzing network log data to detect errors early.
- Improved network traffic by 20%, by monitoring bandwidth log data using Excel dan Power BI to identify bottlenecks.

Web Developer | Freelance *Jan 2026 - Now | Palembang, South Sumatera, Indonesia*

- Engineered end to end finance focused web application system, improving financial data processing efficiency and system reliability by 30%, by developing using Nodejs and Virtual Basic backend logic integrated with SQL database management.

RELATED EXPERIENCE

Full Stack Web Development

Entry Level Accounting Web Based Apps | HTML, CSS, Node.Js, HeidiSQL, Crystal Reports |

- Increased data accuracy to 80% and cut entry time by 40% by building detailed transaction modules using CoA and automated ledger posting and prevented data loss by implementing unathorized login prevention and scheduled database backups.

Gaji Payroll Information System | CodeIgniter, PhP, HeidiSQL, Crytsal Reports |

- Developed a web-based payroll information system using MVC architecture to manage employee data, attendance, job positions, and salary processing, integrating database operations and building an admin dashboard to streamline HR workflows and improve data management efficiency.

Youtube Media Archive | Google Drive, Javascript, Python |

- Built a retro-styled video-sharing platform frontend with a structured streaming layout, displaying video metadata such as creator names, custom tags, duration counters, and publication dates.

Web Based-Short Video | Google Drive, Javascript, Python |

- Developed a short-video streaming module with top-to-bottom playback, automatic duration counters, and creator tags fetched automatically from storage.

Interactive SketchBoard Planning | Flask, Javascript, Python, Json |

- Building a Milanote-inspired interactive visual workspace for creative planning, featuring image placement and resizing, real-time shape manipulation, and custom layouts.

Video Folder Downloader | Flask, Json, Javascript, Python |

- Developed web-based app to batch download hundreds of social media video URLs and package them into single zip file.

Full Stack Data Analyst

BukaToko Product User Behaviour Analysis | R, MySQL, Spreadsheet, Tableau, Google Sheets |

- Analyze cross-platform user behavior and feature effectiveness for an e-commerce app operating in south east asia, Translating usage pattern into product insight that highlight which features drives engagement.

Thrift Store Customer Insight Analyst | MySQL, PowerBI, Spreadsheet |

- Analyze customer behavior and store performance for a thrift retail business using synthetic data from an AI-driven retail simulation, Uncovering actionable insights on shopping patterns, peak hours, and product preferences.

Seoul Sweet Insight Overview | Python, MySQL, Colab, PowerBI |

- Led the end-to-end data lifecycle for a bakery facing rising demand, from SQL data cleaning and manipulation to building an interactive Power BI dashboard and mapping customer-journey problem metrics in Google Sheets, identifying key purchasing patterns and pain points to support business recommendations.

Application Development

Arcade – FeastQuarium (Beta) | Python, Arcade |

- Developed a 2D game applying object-oriented programming, structured game state management, and input validation, with CSV integration for high-score tracking.

Real Time AI Store Simulation Pipeline | Python, Pygame, Excel/CSV |

- Developed an automated real-time data pipeline that streams and logs simulated transaction data, product types, and shopping timestamps directly into Excel/CSV, structured into simulation, agents (NPC), and logging modules to produce a synthetic sales dataset for downstream analysis.

Robotics Development

A Star Line Follower Car | Arduino, OpenCV, Python, C++ |

- Designed and built a prototype autonomous car that uses OpenCV image processing and the A* algorithm to detect and follow predetermined paths without human intervention.

Smart Helmet Anti Sleep | Arduino, OpenCV, Python, C++ |

- Developed a smart helmet system using a microcontroller and data processing software to detect user conditions in real time, triggering automatic warnings to improve rider safety.

Animatronic AI Assistant | Arduino, Python, C++, Autodesk 360, LLaMa API, Gemini API |

- Built an AI-powered hardware assistant that processes voice input in Python, uses the LLaMA API for fast interaction and the Gemini API for complex reasoning, and syncs responses with microcontroller firmware to drive servo motors for real-time animatronic facial movement.

SKILLS

- Hard Skills: Full Stack Data Analyst, Full Stack Web Developer, Robotics Engineer, UI/UX Designer, Video & Photo Editor, IT Supports.
- Programming & Databases: Python, PHP, C++, C#, Visual Basic, SQL (MySQL, phpMyAdmin, HeidiSQL), HTML, CSS, JavaScript, Node.js, Arduino IDE, Xampp.
- Web Development: Web Application Developer, Frontend & Backend Development, REST APIs, Responsive Design, Git/GitHub.
- Data & Intelligent System: Data Analyst, Machine Learning, Computer Vision, Power BI, Tableau, Kaggle, Colab.
- Design & System Modeling: Figma, UI/UX Design, MS Visio, Draw.io, Autodesk.
- Creative & Productivity Tools: Adobe Photoshop, Illustrator, Premiere Pro, After Effects, Filmora, Microsoft Office (Word, Excel, PowerPoint, Docs, Spreadsheets), Jira, AnyDesk, VS Code.
- Soft Skills: Analytical Thinking, Problem Solving, Cross-Functional Collaboration, Technical Communication, Adaptability.
- Language: Bahasa Indonesia (Native), English (Intermediate).

EDUCATION

State Islamic University of North Sumatra *Jul 2021 – Aug 2025*

Bachelor Degree In Computer Science | GPA: 3.59/4.00

Graduated cum laude (GPA 3.59) and has experience in various technical projects, including robotics, systems, and website development, including collaborative team-based projects and a final project presented at an international workshop, as well as participation in competency development seminars and webinars.

CERTIFICATION

- Junior Graphic Design – Komdigi (2024)
- Data Analyst– Special Skills (2026)
- UI/UX Design – Special Skills (2026)
- Machine Learning – Special Skills (2026)
- Data Analytics – RevoU (2026)
